SANITIZING PAINTS FOR WALLS

To improve the indoor environment, **counter the annoying mold problem and breathe healthy air**, Oikos Supersan offers **3 different ecological sanitizing wall paints**, to be used according to your needs

STERYLCALCE natural sanitizing paint

MICOTRAL anti-condensation sanitizing thermal paint

STERYLPAINT anti-mold sanitizing paint

The unbeatable **SUPERSAN** for safe and ecological hygiene.

SterylCalce

REMOVES BACTERIA
BREATHABLE, PREVENTS MOLD

YIELD

16 m²/l max
One coat

DILUTION

1°coat: 20 ÷ 25%
2°coat: 25 ÷ 30%

AVAILABLE COLOURS

116 shades of white

Sterylcalce ecological paint, since ancient times it was used as a natural sanitizer. Lime-based, free of any harmful substance, it has a natural bacteriostatic power given by its high alkalinity: it prevents the formation of molds and colonies of bacteria without the use of harmful chemical additives, **ensures well-being for people who live indoors.**

PACKAGING 1 – 4 – 14 LT

NATURAL SANITIZING PAINT

TO IMPROVE THE ENVIRONMENTS
AND ENSURE WELLNESS

It guarantees a high breathability of the walls, particularly suitable for children's rooms, environments with high water vapor such as the bathroom and kitchen.

⋮ MicoTral

ANTI-CONDENSATION ANTI-MOLD, WASHABLE

YIELD
10 m²/l max
One coat

DILUTION
1°coat: 25 ÷ 30%
2°coat: 20 ÷ 25%

AVAILABLE COLOURS
116 shades of white

Micotral ecological anti-condensation Sanitizing, washable, breathable paint with hollow glass microspheres that act as insulation on the wall, able to reduce thermal shock: “internal heat towards external cold” protecting it from the development of mold and bacteria.

PACKAGING 1 – 4 – 10 LT

THERMAL SANITIZING PAINT

TO IMPROVE THE ENVIRONMENTS AND REDUCE THERMAL IMPACT

MicoTral

STANDARD
PRODUCT

HOT

COLD

Particularly suitable for rooms with a high presence of steam such as bathrooms, kitchens, laundries, where it is easier to form surface condensation which generates mold over time.

SterylPaint

ANTI-MOLD WASHABLE, COVERING

YIELD

22 m²/l max
One coat

DILUTION

1°coat: 30 ÷ 40%
2°coat: 25 ÷ 30%

AVAILABLE COLOURS

116 shades of white

Sterylpaint ecological, breathable and covering, sanitizing, anti-mold paint, particularly suitable in poorly ventilated areas, such as bathrooms and kitchens, where the strong presence of water vapor favors the development of mold and algae.

PACKAGING 1 – 4 – 10 LT

SANITIZING PAINT

TO IMPROVE THE ENVIRONMENTS
AND BREATHE HEALTHY AIR

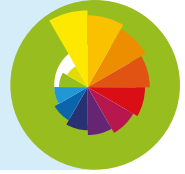

Thanks to the special bactericides and fungicides with sterilizing power, the wall is maintained for a long time, protecting it over time, it also guarantees good washability, resistance to dirt and rubbing. The perfect ecological paint for well-being indoors.

PACKAGING 0,25 - 0,75 L

oikos-paint.it/igienizzanti-per-superfici/sterylplus

THE MOLD PROBLEM

Mold has always been one of the most common problems affecting indoor environments, exposed to the North or with poor ventilation, it does not only represent an aesthetic and olfactory problem, but **a serious risk to people's health and well-being**, as well as damaging and degrade the walls.

Prolonged contact with mold can in fact cause annoying skin and mucous membrane irritations, allergies, eye inflammations, especially in weak subjects such as children, asthmatics or the elderly.

WHY IT IS FORMED

The factors that determine the formation of mold are manifold:

INTERNAL ROOMS

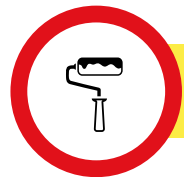

- without windows or poorly ventilated
- facing North
- subject to the formation of condensation and excess humidity in the air
- bathrooms, kitchens, etc.
- poor thermal insulation (cold walls and thermal bridges)
- incorrect heating and ventilation of the house

ANTI-MOLD SOLUTIONS

Supersan offers the possibility to combine products and have a complete **range of solutions to eliminate, prevent mold and algae from the internal walls**, in just few simple steps, guaranteeing health and well-being to people living in the rooms.

ADDITIVE AGAINST MOLD

STERYLPLUS Universal sanitizing additive for paints

If a paint without specific anti-mold properties is used, it is possible to add Sterylplus to transform it into a perfect water-based paint with sanitizing action.

NEUTRALIZE THE MOLD

STERYLFIX Anti-mold sanitizing detergent

For a more in depth removal and sanitization of even the most difficult surfaces.

SANITIZE AND PREPARE THE WALL

STERYLSAN Anti-mold sanitizing primer

To strengthen the sterilization of the walls previously treated with Sterylfix.

PAINT

To improve the internal environment, use a paint that contrasts the formation of mold. Depending on the **different needs**, it is possible to choose 3 different sanitizing paints for walls

STERYLCALCE Anti-mold sanitizing paint

MICOTRAL Anti-condensation sanitizing thermal paint

STERYLPAINT Sanitizing paint, fights bacteria naturally
